

- Courses are run on either an individual or group basis at a variety of locations.
- Accommodation is also available upon request at very reasonable rates.

We can assist you whether you are a novice looking for basic wild deer management training, would like a refresher on carcase handling and meat preparation or are interested in the new Wild Game Meat Hygiene Level Two (a LANTRA recognised qualification).

We are also an Accredited Witness for WDMQ, so if you need to complete your portfolio come to us!

If you have previously attended a WDMQ Level One course and are required to re-sit a particular module to pass the qualification then please contact us for further advice.

#### **WDMQ Level ONE**

The first four days will be predominately classroom-based with the fifth day being the assessment day. Successful candidates will be awarded the Wild Deer Management Qualification Level One certificate. All candidates will be awarded a certificate of attendance.

A full list of all the topics that will be covered over the five-day course can be found on our website or please call us for further details.

The course culminates in a day of examinations designed to test the candidate's knowledge. In addition a range test is conducted to ensure that the candidate is accurate, safe and humane when using a deer calibre rifle.

Successful candidates will be awarded the Wild Deer Management Qualification Level One and are then able to register for the Level Two portfolio.

#### **WDMQ Level TWO**

Level Two is based on in-the-field experience. As an accredited witness for WDMQ, we can provide you with professional assistance ranging from registration to completion of your portfolio.
