

The key benefits of membership are:

- Deer Management census and plan tailored to the individual estate, which complies with the English Woodland Grant Scheme and the Deer Initiative Accord.
- Deer management activities conducted by fully qualified, experienced and insured professionals.
- Income generated to the estate as a result of culling activities either from the value of the venison carcasses, client stalking or a combination of both.
- Reduction in levels of damage to both agricultural, sporting and woodland habitats via active culling in accordance with the Deer Management plan.
- Advice on deer and woodland management related issues such as protection of coppice, location of new plantations and fencing.
- Discounts on Deer Management High Seats.

Membership fees are dependant on the size of the land holding to be managed and the agreement on any stalking activities undertaken.

Membership is an Investment not a cost. Many of our current members have found that the income generated has off-set the membership fee, and for some created a substantial profit.
